Python Programming Practical

Name: Mehek Sawant	Batch: 2
Roll no: 38	Date of assignment: 21/07/26
Class: SYIT	Date of submission: 21/07/26

Q1.a. Write a recursive function to print the factorial for a given number.

Code:

```
def factorial(n):  
    if n == 0 or n == 1:  
        return 1  
    else:  
        return n * factorial(n - 1)  
  
num = int(input("Enter a number: "))  
print(factorial(num))  
  
print("Mehek Sawant S034")
```

Output:

```
python/prac3.py  
Enter a number: 5  
120  
Mehek Sawant S034
```

b. Write a function to check if the input value is Armstrong or not.

Code:

```
def armstrong(num):
```

```
    sum=0
```

```
    temp=num
```

```
    while(temp>0):
```

```
        digit=temp%10
```

```
        sum+=digit**3
```

```
        temp//=10
```

```
    if num==sum:
```

```
        print(num,"is a Armstrong number")
```

```
    else:
```

```
        print(num,"is not a Armstrong number")
```

```
num=int(input("Enter a number to check if it is a armstrongnumber or not: "))
```

```
armstrong(num)
```

```
print("Mehhek Sawant S034")
```

Output:

```
python/prac3.py
```

```
Enter a number to check if it is a armstrongnumber or  
not: 153
```

```
153 is a Armstrong number
```

```
Mehhek Sawant S034
```

```
Enter a number to check if it is a armstrongnumber or  
not: 120
```

```
120 is not a Armstrong number
```

```
Mehhek Sawant S034
```

c. Write a function to check if the input value is Palindrome or not .

Code:

```
def palindrome(num):
```

```
    n=num
```

```
    rev=0
```

```
    while(num!=0):
```

```
        rev=rev*10
```

```
        rev=rev+int(num%10)
```

```
        num=int(num/10)
```

```
    if n==rev:
```

```
        print(n, "is a palindrome number")
```

```
    else:
```

```
        print(n, "is not a palindrome number")
```

```
num=int(input("Enter a number to check if it is a Palindrome or not: "))
```

```
palindrome(num)
```

```
print("Mehek Sawant S034")
```

Output:

```
Enter a number to check if it is a Palindrome or not:
121
121 is a palindrome number
Mehek Sawant S034
```

```
Enter a number to check if it is a Palindrome or not:
153
153 is not a palindrome number
Mehek Sawant S034
```

d. Write a lambda function that checks whether a given string starts with a specific character.

Code:

```
starts_with_char=lambda s, c:s.startswith(c)
print(starts_with_char("hello","h"))
print(starts_with_char("hello","t"))
print(starts_with_char("Python","p"))

print("Mehek Sawant S034")
```

Output:

```
True
False
False
Mehek Sawant S034
>|
```

Q2. Write a python program to convert temperature from celcius to Fahrenheit. (Use the formula: $(fahrenheit = (celsius * 9/5) + 32)$)

Code:

```
cel= int(input("Enter temperature in Celsius: "))

def temp(cel):
    f = (cel * 9/5) + 32
    return f

result=temp(cel)
print("Celsius to Fahrenheit= ", result)

print("Mehek Sawant S034")
```

Output:

```
Enter temperature in Celsius: 0
Celsius to Fahrenheit= 32.0
Mehek Sawant S034
>>
```
